planner projet

equipe front

link all the pages you have done , acceuil , inscription , contact us, connexion { the three members}

afaf

1. complete the home page for both user types and define its routes for rym

2. the editor front

achraf

1. fixe la page d'acceuil + dynamic pictires
2. profile page + editing profile options in the front
3. integrate your front with kaouter's logic

ichrak

1. login front , with the forget password using react just like afaf did, helping rym with the integration
2. the notifications front also

rym

1. login integration
2. add a redirection to the homepage for users register, and login.
3. continue la requete de recherche.

kaouter

1. ajouter ouevre function
2. editing the profile back for both users ,{changing the name in the data base etc..}
3. integrate the back with achraf .

for you all :

1.
2. ask each other , we are a team , we're not going to be a good team if we are shy ,and we're not communicating
3. i love you all , and if you dont finish the work then i wont love you , vendredi apres les ci , we're going to have a meet to prepare for la 2 presentation and we're gonna slay <3 .

1 . learn docker , github
